Introducing Skill-Plus Tools

- The Skills-Plus Tools are part of the series, Building The Bridge: New Strategies to Engage Today’s Volunteers.
- The tools respond to the research findings in “Bridging the Gap – Enriching the Volunteer Experience to Build a Better Future for Our Communities,” as well as other research carried out by leading corporations in the field.

Purpose of Skills-Plus Tools

The purpose of Skills-Plus is to facilitate the linkage between volunteer experience and occupational core competencies so that:

- Non-profits can structure volunteer opportunities to access workplace skills and competencies
- Workplaces can strategically support employee volunteers to meet community and competency-development goals
- Both non-profits and workplaces can use the tool as the basis to define and measure benefits, value and the return on investment (ROI) of employer-supported volunteering

What are the Skills-Plus Tools?

- A Volunteer Opportunity template
- 19 sample volunteer opportunities
- A Competency Matrix
- A Community Investment Scenario
- A Skills-Based Volunteering Card Game
- A Training Resource for workplaces, employees and non-profit organizations on the purpose and use of the tool
## Competency Matrix

This matrix contains a range of competencies that can be developed through various types of volunteer opportunities. Next to each competency, you will find numbers that correspond to sample volunteer opportunities. When you click on the number, it will take you to a sample volunteer opportunity that can develop this particular competency. It will also describe related occupations that require this competency and provide links to the National Occupational Classification system, hosted by Human Resources and Skills Development Canada. In this way, you can explore both volunteer types and occupations that either require or develop the competency of interest. When you are on a Volunteer Opportunity Description and want to return to the matrix, simply click the “MATRIX” button at the top or bottom of the page. When you are on the National Occupational Classification system site, click the PDF icon at the bottom of your screen to return to Skills-Plus. Please note that when you are linked to the National Occupational Classification system site, you may have to scroll down and click on the specific occupation of interest.

- 4412 Home Support Workers, Housekeepers and Related Occupations

This would be a great opportunity for someone at any employment level and in any occupation to develop and enhance their communication and interpersonal skills.
Scenario#1 The Community Investment Committee: Decision-Making Grid

The Community Investment Committee meets once a month to review the requests received from community organizations for donations, sponsorships, gifts-in-kind, pro-bono services and employer-supported volunteering. The committee is in the process of revising the decision-making grid. There are six members of the committee; the Director of Marketing, the Manager of Staff Development (from the Human Resources Department), the Chair of the Employee Social Committee, the Vice-President of Finance, an employee representative (non-management position) and an external member from a community organization.

You are a member of the committee. Review the grid below and assign a percentage for each component, with the total adding up to 100. While they may all be important, for this exercise, avoid distributing the 100 points evenly. You can change or add new components if you like. In the Comments column, note your reasons for the weighting and any changes you would recommend.
